Support	Dale	Olmstead	Moved to FL many years ago and have never understood why PBC does not do a better job with planning for ease of transportation for its citizens: 1) intersection lighting needs to be adjusted to allow time for these new and larger intersections to clear, 2) Multi-lane boulevards allowing cross-overs are plain dumb and dangerous. Proceed to lighted turn-arounds beyond main intersection. Plan and build roads first! Allowing development before roads makes no sense-----	13833 52ND CT N	WEST PALM BEACH	2/11/2020 7:40
Oppose	SHARON	BROSS	I continue to be concerned by the authorities insist on running SR 7 adjacent to the water supply for West Palm Beach. It has been made very clear the potential of a disaster occurring and yet they cannot seem to be able to work on any other alternatives other than the original plan. Perhaps it's time for an outside environmental agency and governing authority to mediate this situation. The plan calls for jogs, a low lying bridge, and with all the growth on Northlake Blvd. to the west of SR 7, why isn't it being considered to extend the road through the Acreage to serve the exploding population that will be moving into the new developments?	10732 Orchid Reserve Drive	West Palm Beach	2/11/2020 9:59
Oppose	Jess	Kravitz	As a full time resident of West Palm Beach I could not be any more opposed to the plans to extend SR7 to Northlake Blvd. While I understand traffic and the need for ways to move traffic around, this is simply a bad idea that has no good outcomes for anyone. Besides the immediate impact and damage to the environment which we should be protecting for our children, grandchildren and future generations, and once done can never be reversed, the long term is equally dim. The disruption of wildlife which has occupied this area for thousands of years will forever alter their breeding and habitat. In addition, the likely potential for altering flood zones and associated impacts is unconscionable. While I am for progress, I am not for progress at any cost. With the thousands of cars that will traverse this road daily, the pollution from fossil fuel exhaust, the rubber worn of tires, leaking oil from cars onto the road which will eventually find its way into our precious waterways, and the trash strewn about by careless or uncaring motorists challenge the very essence of what we should all be working so hard to protect. Money should not be the motivator here, there's a much bigger picture that must be considered.	10144 Sand Cay Lane	West Palm Beach	2/11/2020 10:16
Support	Patty	Chait	I am a resident not living too far from the proposed extension and can't believe with the new communities going up on Northlake that the expansion would not be going through. How dare PBG allow so much new growth without a plan for the 3000plus new homes and businesses going up. We can not get out of our developments now in the mornings and traffic at a standstill in the early evenings. If I had known when I purchased my home there that it was not going to be an alternate route I would never have bought there. Please don't allow this to not happen	11130 Osprey Lake Lane	Palm Beach Gardens	2/11/2020 10:27

Support	Benjanin	Franklin	There are only two east/west through arteries between Pratt-Whitney and the turnpike and I95 for eight(8) miles. Already, there is massive traffic passing from 6:30 AM-9:30 AM going east and between 4:00-6:30 PM. There is an enormous community being constructed west of IBIS. If State Road 7 is completed to Northlake it will surely necessitate a traffic light at the intersection of State Road 7 and Northlake. With the added traffic from the large community, expected to be completed within 5 years, the traffic will certainly be compounded. The traffic light will slow the traffic flow even more and thus extend the major traffic even longer than already exists. An added traffic light would mean that there would be 3 traffic lights within 1/2 mile. It might be prudent for some intelligent people in the area of traffic control to spend some days observing and visualizing the impact that additional traffic and an additional traffic light might have on the area and artery. A major event (accident/chase) closed down Northlake going west. More traffic begets more accidents, especially in irritated motorists. Picture the route a person must take if they live west off Northlake to get home if the west bound lane is closed. This, along with the environmental concerns is well beyond evidence to delay the construction of extending State Road 7 to Northlake.	10318 Orchid Reserve Drive	West Palm Beach	2/11/2020 10:35
Oppose	Joseph	Amodeo	The proposed extension of SR-7 through the Grassy Waters Nature Preserve is horribly short sighted. The environmental impact is not being fully understood. In the best case scenario, the impacts will not be good for this essential environmental resource. In the worst case, irreversible damage will be done to our native wildlife to say nothing of our essential water resources in my opinion, the risks far exceeded any potential benefits that may result in further destroying that which makes living in this county so attractive in the first place.	8406 Quail Meadow Way	West Palm Beach	2/11/2020 10:58

Support	William	Green	Regarding the extension of SR 7 to Northlake Blvd, what plans do you have to widen Northlake's 2 lanes in each direction from The Club at Ibis to the Beeline? You must be aware that at morning and evening rush hours Northlake is packed with traffic and generally traveling at lower than posted speed limits! Adding SR 7 direct traffic will create a major problem for travelers.	6640 Audubon Trace W	West Palm Beach	2/11/2020 11:20

Support	Judy	Plunske	Traffic on Seminole Pratt Whitney Road - North - South travel in AM is backed-up, travel slow along with 6 traffic lights from Sycamore to 60th and plans to add 2 more traffic lights to accommodate soccer fields. Recommend utilizing existing lights and move Westlake traffic within their own properties rather than directing onto Seminole Pratt. In addition Westlake has created problems within the adjacent properties causing ground water levels to be lowered (ponds have been depleted of water) in immediate area and attempting to contact authorities to resolve any issues has been ignored. Any new projects SHOULD NOT NEGATIVELY affect surrounding areas in order to beautify their area. TRAFFIC WILL continue to increase and the Western community has been ignored and we must extend the SR 7 portion to North Lake as planned for the last 20 years.	16058 E Mead Hill Dr	Loxahatchee	2/11/2020 13:22
Oppose	Diane	Carlino	I strongly urge deletion of the SR7 extension project onto Northlake Blvd from the Long Range Transportation plan All the objections previously raised remain critical factors. Please strongly consider the adverse impacts to the Club at Ibis (environmental, traffic, etc.), the surrounding wetland areas and the increased traffic onto Northlake Blvd, factors already causing opposition by juristictional environmental agencies as well as the City of West Palm Beach.	6620 Sparrow Hawk Dr	West Palm Beach	2/11/2020 13:34
Support	Jennifer	Johnson	I support the SR7 extension to Northlake Blvd. It has been necessary for many years now and the more the county allows these crooked developers to ruin this area's original rural intention the worse traffic has become. If you don't want to build the extension then quit allowing these money grubbing bait and switch developers the ruin of our neighborhoods and intended way of life. The love of money on full display by our county government and politicians. What a shame but no surprise.	15741 95th Lane North	West Palm Beach	2/11/2020 13:47
Oppose	Jesse	Faber	As presented this is an ill conceived plan. Putting SR7 anywhere near Grassy Waters jeopardizes the county's drinking water and the environment. If you must build this road, go further west along Coconut Road where there's lots of space for it and it wouldn't have the potential to negatively impact the drinking water supply for the entire county. Support	Kathryn	Warren	We really need the State Road 7 Extension. Since having purchased land and building our house in 1997, we have been promised this road. The road congestion has continuously increased over the years, and the travel time to and from the Acreage has increased. I hope that the county, regional, and state officials will seriously consider returning the State Road 7 extension to the agenda.	16302 63rd Rd N	Loxahatchee	2/11/2020 14:20
Support	aida	Buttelman	I have lived out in BayHill for over 25 years and know the need to add the extension of SR7. The increase in new homes across from us and in the second phase of Bayhill has increased the number of cars traveling in both directions. THIS MUCH NEEDED ROAD MUST BE BUILT FOR NOT ONLY ROAD CAPACITY, BUT FOR OUR SAFETY SHOULD WE BE UNABLE TO EXIT ONTO NORTHLAKE. PLEASE ACCELERATE THE PLANNING AND BUILD THIS SOON!	7527 Orchid Hammock Drive	West Palm Beach	2/11/2020 15:13
Support	Lynn	Sweetay	With traffic increasing all the time in the area it is imperative to increase entrance and exit roads to the Acreage. If you live in this growing area the only ways out are across Northlake Blvd, East, South on Coconut to Orange and State Rd 7, South on Royal Palm Beach Blvd to Okeechobee and South on Seminole Pratt Whitney to Southern Blvd. Construction of Ancient Tree on Northlake Blvd along with Westlake which will impact 60th St will increase traffic drastically. We must have an alternative route north-south that connects to Northlake Blvd. Going east on Northlake from Seminole Pratt Whitney there are few roads that run North-South. Once you pass Coconut there is no N-S road until you reach the Beeline Hwy. If there is an accident on Northlake during rush hour (as I once experienced) there is no way to go south or north to get another route. The only choice is to turn around and go back west on Northlake or sit in bumper to bumper traffic until it is cleared (in my case 2 hours). Unfortunately the thing we love about the Acreage, its surroundings of natural areas and open spaces is our limiting factor for growth. Extension of State Road 7 up to Northlake would give us an alternate route without dramatically increasing a "web of roads" which would spoil the country feel of the area.	14136 82nd St N	Loxahatchee	2/11/2020 15:16
Oppose	Bob	Budnick	I am vehemently opposed to the SR7 project as it is currently presented. Having reviewed many of the presentations on the topic it seems quite obvious that the risk to our West Palm Beach water supply as well as the risk of flooding within Ibis far exceed any benefit to be gained from the road construction. Since much of the traffic is coming from west of Ibis it makes much more sense to move the road west, IF IT IS EVEN REQUIRED. It's also very unclear to me what the real cost of the project will be. Different presentations seem to present different numbers. Having a history of complex project management, if there's this much difference of opinion on the real costs then it's fraught with opportunity of being a runaway project. Where's the accountability if this far into the planning there's no clear price tag associated with the project?	10295 Terra lago Dr	West Palm Beach	2/11/2020 16:24
Oppose	Frank	Calhoun	Negative : Instead of people driving on 95 or turnpike, itâ€™ll cause all traffic to go to SR7 creating more of a headache. Leave it as it is.			2/11/2020 16:24

Support	Ellen	Sespaniak	This extension is necessary for the safety of the public citizens living in the western communities. Other areas in the county have experienced increased traffic due to overdevelopment like our community has, however they have multiple alternative route options they can seek. The acreage residents really only have 2 options right now to get out. The few roads that we do have out here are already congested due to the amount of people that drive to and from work everyday. Our side roads such as coconut and orange have too many cars on them during peak hours. I can't tell you how many times I've been stuck at home because the roads were backed up. We are also gridlocked as it is now when there is an accident, let alone when all of these new developments get built and there's even more traffic on the road. The City of West Palm Beach agreed to the SR7 extension as part of the agreement to develop and build all of the neighborhoods that surround our community. They need to follow through with that agreement and be held accountable as not doing so would threaten the lives of people living in our community. The acreage/loxahatchee community has been in need of this critical infrastructure for years, and without the SR7 extension there will be no way for our communities to evacuate if needed. Public safety needs to come first. Please build this extension, our community desperately needs it.	13717 74th St N	West Palm Beach	2/11/2020 17:50
Oppose	Harry	Kaufman	<p>As a full time resident of West Palm Beach I could not be any more opposed to the plans to extend SR7 to Northlake Blvd. While I understand traffic and the need for ways to move traffic around, this is simply a bad idea that has no good outcomes for anyone. Besides the immediate impact and damage to the environment which we should be protecting for our children, grandchildren and future generations, and once done can never be reversed, the long term is equally dim. The disruption of wildlife which has occupied this area for thousands of years will forever alter their breeding and habitat. In addition, the likely potential for altering flood zones and associated impacts is unconscionable. While I am for progress, I am not for progress at any cost.</p> <p>With the thousands of cars that will traverse this road daily, the pollution from fossil fuel exhaust, the rubber worn of tires, leaking oil from cars onto the road which will eventually find its way into our precious waterways, and the trash strewn about by careless or uncaring motorists challenge the very essence of what we should all be working so hard to protect. Money should not be the motivator here, there's a much bigger picture that must be considered.</p>		West Palm Beach	2/11/2020 18:06
Oppose	Dianna	Slodowitz	Do not continue to pollute Florida with mega highways. The proposed Rte 7 runs thru Grassy Waters which should be revered as natural area. Support	Melissa	DAmico	This extension is a vital component to our area in terms of congestion. Many mornings and afternoons, to many to count we all in The Acreage have sat in hours of stop and go traffic due to accidents with no where else to go. It really is a no brainer. Would we all want this had the building of all these new projects, probably not. But if you are going to add, between Westlake (4500 house), Avenir (over 6000 homes and businesses), Ancient Tree ...then the roads are needed, two lanes on Northlake are NOT going to hold all these people. It is important that this extension happens. Thank you.	13759 82nd Ln N	West Palm Beach	2/11/2020 19:39

Support	Hart	Collier	I support the connection of State rd 7 to Northlake. After being in the Acreage for over 20 years I've seen the growth that happens throughout the years, and the amount of traffic that bottlenecks the area strangles peoples' morning commute. One accident will cause backups that can last 3-4 hours. With the addition of close to 8000 homes in these next 5-10 years it's crazy to think that not adding a connecting road that has been in the plans since the 70s and is still not being approved. The family homes that are on Coconut and orange will be in danger if they just create bigger roadways in those areas. Make the extension happen!	62nd Pl N	Loxahatchee	2/11/2020 20:34

Minto came out to the Acreage and built a "city" without any road framework. Without the SR -7 extension the residents of West Lake and GL homes will be driving through our residential streets. It is ludicrous to allow one development "Ibis" to decide that they do not want the road next to their houses and so the entire area will now have to have thousands of cars cutting through our residence	13925 42nd Rd N	West Palm Beach	2/11/2020 20:58

Support	Dan	Grigsby	We are so discouraged by the SR-7 project being removed from the 5 year plan. We have lived in the acreage for 25 years been land owners for 40 years and it makes us sick to see the amount of money that is being wasted by our government on an issue that has been promised to us for the last 25 years . It's 4 miles of land that is not even going through the water easement it is on the outside boundary . It will begin to save lives if those that travel these roads instead infringe on WPB water. Think about what we are talking about financially and the years we have wasted fighting this issue. Isn't it time we put our money to use on other issues instead of this one. Support	Myles	Partridge	PLEASE consider adding the State Road 7 extension back to the long term plan!! If you've ever been in the Acreage at rush hour, it's unbelievable how much traffic runs through peoples' front yards! There are children riding bikes through highway level traffic. I know this road was planned long before several of the new communities were built out west and those developments were contingent on that road being built. The current roads cannot support the traffic with all of these new people in the area. Not only is it dangerous for the neighborhood kids, but it's a huge potential liability for emergency response times.	13591 80th Ln N	West Palm Beach	2/11/2020 21:24

It is desperately needed to alleviate massive amounts of traffic going through residential neighborhoods. There is simply no excuse for not completing this road. It is a safety issue and absolutely necessary to accommodate the traffic we have now, not just in the future. 			<p>Good day, With all the new developments coming out here, ie; Ancient Tree (where they cut down all the trees) and Westlake (that no one wants here), we will definitely need the 441 extension built. The roads are already becoming over crowded as it is and Seminole Pratt, orange blvd and coconut will need relief from the traffic as more of these cookie cutter houses are built out here. Residence that live along the side streets of coconut already have a hard enough time trying to pull out onto coconut with the amount of traffic that travels along the road, especially during rush hour. The 441 extension is a necessity! Although it's an evil necessity that will push a lot of wild life out of their homes, it is still a necessity. So as long as we can design the extension in the same manner as the current road, with gates and barricades blocking both sides and protecting the preserves, I believe we can make this extension work for both wild life and traffic. Please look at the long term, negative effects that will take place out here if the extension is not built. The extension will even help fire rescue and emergency crews get from one side to another at a faster rate as well.</p> <p>Also, now to get off topic.. at Seminole pratt and northlake, I know there are plans for a 3 way traffic signal, but that will only back up northlake traffic even more during rush hour. Instead, consider a round about, all that would need to be done is to excavate the land just in front of the canal bank to make room for a large enough round about that can accommodate all the larger trucks and trailers that pass through there. A round about is more sufficient at that 3 way intersection then a light would be.</p>

Support	Jeffrey	Keller	The SR7 extension needs to be put back on the Palm Beach County Long Range Plan. Taking it off was an enormous mistake. With the growth of the western communities, the traffic flow is stagnant and in the situation of an emergency evacuation, it would be incredibly difficult for everyone to leave. The new development of Westlake is essentially land locked, with the only avenue for leaving the City either North or South on Seminole Pratt Whitney. This congests Northlake, Okeechobee, and Southern. Being that this has been on the County's long range plan for nearly 20 years, taking it off is simply dumb. Westlake and Avenir were approved with the extension on the Long Range Plan and now it isn't, which makes the traffic studies done for these communities null and void. It needs to be added back on.	5897 Quailberry Court	Westlake	2/11/2020 22:15

I heard that the Ibis community is using what was the beginning of the extension as their own private road and have even put a gate at the end of it. Why are they the only ones that can use it? I also heard that it is their community that is against the completion of this project. They should not be allowed to use any part of the road for their own access. The entrance to their community should be closed off with barriers along the end of the SR7 extension and everyone should use their main entrance to enter and exit. If they are against the extension they should made made to be against all of it, not get to enjoy the piece that benefits them while opposing the remainder of the project that benefits the entire area. Tired of the excuses and wasting of taxpayer funds for lawyers. You're not buying off a lobbyist. This is for the safety of area residents who have to drive Northlake every single day like I do with endless traffic jams. Ibis reaps the benefit of that very contract they refuse to abide by. It's time that contract be fully enforced with the same meeting of the minds as when it was entered into. If not, anything that enriched Ibis through that contract should be nullified and reversed at Ibis' expense.	15133 92nd Court North	West Palm Beach	2/12/2020 5:17

Support	Stacie	Draper	SR 7 extension is such an important road to create. Northlake is my primary road going to my home, to work, to retail shopping. I travel Northlake on a day to day basis. If there is a random accident, the shortest delay I've had was approximately 20 minutes. The longest, 2 hours. Yes! 2 hours sitting in traffic. This has cost me time, my employer time, and I have been late for my Civic duty of jury duty. I would hate to need emergency services during a backup. And there isn't a way to bypass. This issue is without the oncoming homes and building. The road infrastructure out in the Western communities isn't built for the volume it will receive. This is why any road relief isn't just wanted, but necessary. This should have been a priority prior to the pop-up communities that continue to develop, but the people of the Acreage are begging for relief of our roads. Building SR7 extension would give a way to bypass, a way to get out, and a way to relieve some of the traffic congestion.	15048 87th Rd n	Loxahatchee	2/12/2020 6:12

Support	Catherine	Probst	As a resident of Palm Beach County my entire 56 years of life and of the Acreage for 30 years, the 441 extension is something that has been on the books, funded and ready to construct for many, many years. The issues and delays are beyond frustrating and make absolutely no sense. How a select few people and lawyers have allowed this project to be delayed, stopped and removed from the long range road plan is beyond wrong. So let me make it official, yes, we want the extension to happen, we need the extension to happen. The road network system in the Acreage area is completely insufficient and is not appropriate for the amount of homes in and around the area. As for the 441 extension, this will allow a roadway on the outskirts of the community for commuters and emergency vehicles to have options for getting from Point A to Point B. I spoke at the February 11 meeting at Seminole Ridge, beyond frustrated and confused about why in the world it requires public comment, attending meetings and input about the building of a road that was proposed, planned AND funded, is supported by thousands of people for the benefit of proper road network, supported by surrounding municipalities. Unfortunately, people don't take the time to attend meetings with busy lives and family commitments. It's not fair that at this point, this input process is being asked for and any determination made based on public input. This has been done over and over again. Support	Richard	Murray	I've lived in the Acreage for 28 years and have witnessed the increase in population and traffic in this area. Now more than ever with several large developments being built we need the extension of SR7 from Okeechobee Blvd to Northlake Blvd to help handle the increase of traffic that already clogs our roads. The impact of the road on the Grassy Waters water catchment area will be minimal compared to the impact of a huge development like Ibis with three golf courses and thousands of highly maintained landscapes which are already draining pollutants into the water catchment area. It is distressing to see the approval of large developments in this area with the promises of future road expansion only to have the road projects stymied by the not in my backyard mentality.	12219 Sunset Blvd	West Palm Beach	2/12/2020 7:38
Support	Betty	Argue	Please add SR7 extension back onto the LRTP as well as the widening of the existing SR7 from 60th to Okeechobee. It is absolutely essential for all the development traffic predicated on that road existing. The Acreage is not a viable alternative route. We have homes with driveways on these roads. SR7 already exists to serve the IBIS plaza and the IBIS development that we're all approved with agreement and understanding that SR7 would be on their east	16886 west Alan Black Blvd.	Loxahatchee	2/12/2020 7:41

Should there be a brush fire like there was in 2003, and 2017, and residents needed to evacuate, the possibility of residents not being able to get out is extremely high. There are many times when routes must be changed due to an accident on Northlake and it takes hours just in the morning, now imagine if everyone is evacuating. 441 is essential and elected officials need to stop the BS! Bus stops on Coconut are in a high traffic area, with nowhere else to go, and those elected and trying to stop the extension are at fault. Support	Sharon	Hanley	Our rural area, The Acreage, cannot continue to support the new construction traffic speeding through our neighborhood any longer. I moved here so my daughter can enjoy a rural environment. That life has slowly but surely been eroded since 2005. If the County continues to permit overcrowding construction for housing then it goes without saying one must install the extension of State Road 7/441. It is unethical to do anything less than that. Support	Stephanie	Haas	The extension is absolutely necessary, the fact that it has been fought over and delayed for so many years is unconscionable. Northlake blvd under the best of circumstances is at maximum capacity and with the introduction of new developments and thousands of more residents the commute down Northlake during rush hour will be a nightmare. There are no reliever routes and just a simple accident can cause hours of congestion and delays. Just because there is money and political clout residing in Ibis is no reason to overlook the obvious and the needs of the majority of the residents west of the B-line. I live in the Western community and we pay just as much taxes as anyone and get nearly the roads other areas get in the county. This is a MUST needed road. Our community is growing like cancer daily and we do not have the roads to handle this growth. Northlake Blvd. needs to be six-lanes. We have only three ways out of The Acreage community and one road is 25 mph which is ludicrous. This extension has been on plans for over two decades if not more. We NEED this extension. We NEED this road. This road is a necessity for our community and for any emergencies especially any "act of God" emergencies. Support	D	Per	To whom it may concern and greetings. I'm deeply sorry I couldn't attend the meeting. I'd like to express my opinion on the SR 7. I currently live in the Acreage off of Northlake Blvd. I truly believe the extension is a necessity. During the traffic peak hours the traffic congestion is insane. Not only do our local government officials need to make the right decision on this matter but we as a community are doing injustice to our first responders. I've seen them first hand trying to respond to emergencies in our community and it's definitely a challenge for them. Especially with the recently added useless turnabout circle on 140th Ave and Temple. Our local government officials need to step up and grab the bull by the horns with this matter. There's major development going around in the western community that will only continue to add more stress to our on going traffic nightmare. I believe the SR 7 extension will definitely alleviate the traffic congestion in our western community. Do the right thing and vote for the extension and let's grow not only our communities but SR 7 too.			2/12/2020 9:05

Support	Lisa	El-Ramey	Since 1972, the future of SR7 has been known. A gravel road, there for years, is now blocked off. The existence of Ibis was, and is, contingent on this extension. Residents of Ibis enjoy a private back entrance, on the taxpayer dime, for the northern portion of this extension already built. Ibis is not unique in their behavior of blocking roads in order to "protect their lifestyle". Andros Isles, Bayside, Avenir and Riverwalk residents, also created with similar contingencies, including SR7, have leagued with Ibis on this matter. The residents of these developments should note, their presence has impacted all of us in the western communities who moved here to pursue a wide open, dirt road, "country" lifestyle. Free from the degree of traffic, lights, and crime seen in high density areas. Free to draw our own water from the ground and sustain ourselves. Free to live with our livestock, enjoy the natural tree canopy, flora, and fauna, see the night sky, and introduce our children to rural life. Our properties produce vegetables, fruits, eggs and more, much of which those frequenting farmers markets in the area enjoy. The City of West Palm Beach's argument of the quality of their water being affected is moot, since the mere presence of all the above developments directly impacts Grassy Waters Preserve and encroaches on it's historic footprint. The additional argument of the pristine nature of these waters is also in doubt given the amounts of chemicals placed into these areas to "maintain" them. ALL of these developments destroy the environment which is required for the residents of the western communities to assert their right to Life, Liberty and pursuit of Happiness proclaimed in our country's own Declaration of Independence. So, while all who live in the western communities would like to see the clock turned back and have none of the developments, current or future, exist. In the case of SR7, this extension MUST be allowed to progress. This is essential to relieve the pressure and traffic placed on the rural residential roads of surrounding communities long in existence before the offending developments arrived.	3828 B Road	Loxahatchee	2/12/2020 10:08

Support	Richard	Diaz	Reinstate the State Road 7 extension projects between 60th St North and Northlake Blvd back on the LRTP 2045, it should have never been removed. This roadway was agreed to as a condition for approval of the construction of the Ibis Country Club and HOA. To deny it now, with all the other new construction coming out here, is a slap in the face to the residents of the Acreage who already deal daily with the lack of north-south and east-west thoroughfares that make ingress and egress of this area difficult. The added vehicular traffic from the Ancient Tree, Avenir and GL Homes developments will exacerbate and already over-burdened Northlake Blvd. and make the quality of life for these residents miserable. Support	Christine	Johnson	Why is SR7 continuously on hold due to an expired permit while FDOT decides on its next step? It's because the City of West Palm Beach or should I say the residents of IBIS don't want it. This road was already once approved and was anticipated to be completed in 2015 until lawyers got involved. Our traffic through the Acreage has been increasing for a long time, and since the county doesn't have any plans for widening Coconut any time soon we are basically stuck when any major traffic incidents happen. I have no problem with expansion as this is the world in which we live. I do however have a problem with those putting blindfolds on when it comes to not taking our roads into consideration regarding the increased traffic that comes with said expansion. Support	Carol	Gannett	Please reinstate SR7 extension project. Traffic is already strained out west & with all the new homes & w/new houses still being built Northlake Blvd is already over-trafficked & packed to the gills. Only 2 lanes east & all it takes is one accident & it's gridlock for hours! We need more ways to commute from out west & not be in fear of our lives! Thank you.			2/12/2020 11:06
Support	Nancy	Hyman	Extending State Route 7 to Northlake is a road to nowhere. Once getting to Northlake you still have to turn left or right and drive many miles to get to any shops, office buildings, schools. Add to this the proximity to the West Palm Beach water source (Grassy Waters), makes this extension useless and dangerous to the environment.	10782 Egret Pointe Lane	West Palm Beach	2/12/2020 11:14

Support	Raymond	Hart	The State Road 7 Extension should be a priority and not a political issue funded by the residents of Ibis. It is a much needed road to help relieve the traffic thru the acreage which is going to just get worse with the addition of West Lake. Northlake Blvd should also be widened from 2 to 6 lanes all the way to Seminole Pratt Whitney. Support	Stephen	Endebrook	With all of the development approved for Westlake, Avenir and Northlake Blvd, we need access off of Northlake to get us to Wellington. I strongly support the extension of SR 7 from Northlake Blvd to Okeechobee Blvd. The West Palm argument against the road is bogus. There are already miles of roads that abut their "water supply" and from what I've seen of the barriers that already exist on SR 7 to 60th North, they are much more robust than what I see on Okeechobee Blvd going into downtown. Isn't Clear Lake also pegged as "water supply" for West Palm beach? What a bogus argument.	7759 Eden Ridge Way	Palm Beach Gardens	2/12/2020 12:05

Support	David	Burstein	I strongly encourage the completion of SR7 from 60th St to Northlake Blvd. This project was approved for completion prior to the residential homes built in the area and serves the greater community. Support	Nicole	Pawlowskis	Please put the completion of SR-7 through to Northlake back into the plan. The people who live in the acreage have been suffering the effects of overdevelopment and increased traffic due to communities like ibis, ancient tree and now the start of development at avenir. It is absurd that the plan to extend SR-7 was cancelled but the widening of Royal Palm Beach is being put through. That is NOT where the issue lies and will not relieve the traffic issues we have. It will only further strip the acreage of its rural character. I live on 60th st N and people drive as if they are on 95. There should not be people doing burnouts in the roundabout, racing, speeding, and revving their engines at all hours of the day and night in a RESIDENTIAL NEIGHBORHOOD. I should not have people coming up on my bumper and trying to pass me at 60+ mph as I attempt to turn into MY HOME. Completion of the extension would relieve 60th St., RPB Blvd., Orange and Coconut of a large portion of the traffic it receives as people would no longer have to cut through the acreage to get to Northlake. Please consider the needs and concerns of acreage residents who are very quickly losing their way of life to the demands of the wealthy newcomers and their gated communities.	11130 60th st n	West palm beach	2/12/2020 12:19

Support	Al	Dawson	I am a 15 year Ibis resident. There is no sensible argument to be made against extending SR 7 from Okeechobee to Northlake. It's been planned since before I became a resident. It is absolutely needed more so today than ever before due to the explosive growth of the western communities including Avenir and Ancient Tree. Pressure on Northlake is relentless and getting worse. A southern outlet is seriously needed. Pious protestations about the safety of the water supply are cynical, and frankly, a red herring. If the Grassy Waters were so endangered, why were Northlake and the Beeline ever built? They certainly pose more creditable danger than the two mile extension of SR 7. Build it. It is needed. Full stop.	7150 Winding Bay Ln	West Palm Beach	2/12/2020 13:02
Support	Melanie	Steiner	With all the developments and influx of population, we desperately need state rd 7 to connect to Northlake. It is a severe safety issue to only have Northlake as an East/west access route at the northern end where hundreds of vehicles travel on from all over the acreage/ lox. Okeechobee blvd is the next main road and also is ridiculous now that it is 30 mph. Please help us. It's getting worse by the week. New homeowners as well as hundreds of construction workers and trucks make this area such a safety concern.	17068 valencia blvd	Loxahatchee	2/12/2020 13:04

Support	Craig	Fialkowski	Due to excessive development in the western communities, there is an extreme need for additional road capacity to handle the thousands of daily trips being created. The SR7 Extension is needed for several reasons. 1. to allow traffic to avoid Okeechobee Blvd (Royal Palm Beach) in order to travel North to Northlake. 2. Reduce traffic on Northlake for residents who need to travel south. 3. Offer evacuation routes for emergencies.	1547 Fiddlewood Ct	Royal Palm Beach	2/12/2020 13:05

Oppose	Gina	Lloyd	We are not in support of the State Rd 7 extension or the local and natural disruption this pass through would create. As a resident who lives on 60th Street I have seen an enormous amount of wildlife increase on my own property as development clears the land around me. What will be done to mitigate for the wildlife now taking refuge on my land, when you come pave 60th Street and turn it into a highway leading through the nature preserve? What will be done to mitigate the quality of life for the residents that chose 60th Street because it was a sleepy little dirt road? Our local back streets and the residents who live on them along with the wildlife should not be penalized and forced to pay for a lack of evacuation planning through the destruction of our land and natural areas!	12290 60th Street N	West Palm Beach	2/12/2020 13:22

Support	Lynne	Cross	State Road 7 has been in the plan for as long as I can remember and I am a 53 year PBG/acreage resident. The plan has been approved and reviewed by numerous agencies. It is difficult to understand how one development can tie this up in court so the extension is not completed. This extension is needed for the growth of the area and being able to use an alternative instead of major traffic running through neighborhoods with bus stops. It is difficult to get in and out of the area now. I can't imagine when construction on all the developments are complete.	9339 Grapeview Blvd	West Palm Beach	2/12/2020 13:25
Support	Penny	Pankratz	State Road 7 needs to go through to Northlake. The traffic flow should have been in place by the time all these new subdivisions were started on Northlake. Traffic will be a nightmare if you don't provide another access off of Northlake to go south. Coconut will not be able to handle that much traffic day after day. Widening what is in place and extending the road to Northlake is greatly needed and what was intended when the extension was first started. Support	Jill	Palmieri	State Rd 7 extension is a great way to alleviate the added congested traffic in the acreage and its surrounded areas. There is so much development going on that the amount of traffic will be astronomical. After these developments are completed there will be slowed response times for emergency vehicles for fire, rescue and police. The commute times will double or triple. If we do not do something now by the time these areas are completed it will be impossible to get in and out of our homes in a timely matter.	14844 62nd Ct N	Loxahatchee	2/12/2020 13:42

This is DANGEROUS, the people of the western communities desperately need this road! It is a necessity! Emergency vehicles, people traveling to work, school, etc. 10's of thousands of additional vehicles will be on the road within the next few years which will be a NIGHTMARE without this VITAL extension. Support	sandra	browning	<p>I am really concerned with the increased amount of traffic through our Equestrian neighborhood due to the massive building projects and Westlake.</p> <p>SR7 was partially built as a reliever road, however, it is extremely hard to get on it in the Morning Rush hour as people heading South will not stop or slow down to let people on from Orange, Persimmon, Orange Grove etc. Also, this road should go all the way through to Northlake, as people that live North take SR7 as far as they can then cut through our neighborhood and congest our smaller Royal palm Blvd and Coconut and all of the side streets.</p> <p>I strongly agree with completing the project to extend SR7 from 60th to northlake as well as widening SR7 from Okeechobee to 60th.</p> <p>TPA013SR 7 from SR 7 from Okeechobee Blvd to 60th St AGREE TPA014 SR 7 from 60th St to Northlake Blvd AGREE</p>	4272 123RD TRL N	WEST PALM BEACH	2/12/2020 16:55

Additionally, our side streets are becoming so congested.</p> <p>it is almost impossible to get onto SR7 from Eastbound Orange Grove or Eastbound Persimmon as South bound Traffic will not let you in. Support	Kathleen	Birch	My husband has to go down Northlake to get to work each day and there is always a back up. If there's an accident, forget it. If 441 (State Road 7) was made from Okeechobee to Northlake, it would alleviate a lot of this traffic build up. Also, this is happening without the new developments being built out along Northlake. Widening Coconut Blvd is only going to dump our residential people into the Northlake traffic a little easier than it is now. Does this solve the problem? Hardly. We cannot make it to the meeting at 9:00 am on the 20th due to work schedules, but we are all for extending 441.. We really don't care what the development of IBIS thinks. WE need it.	12247 Key Lime Blvd	West Palm Beach	2/12/2020 18:51
Support	Janet	Rowland	Reinstate the State Road 7 extension projects between 60th St North and Northlake Blvd back on the LRTP 2045, it should have never been removed. Without these projects being completed, the current and future residents will have their quality of life be impacted greatly. Imagine the traffic in Atlanta being handled by two-lane and 3-lane roads.		West Palm Beach	2/12/2020 19:13
Support	Anne-Louise	Seabury	The extension is essential. Population is growing in the western communities. For the safety of residents we need additional access points in and out of the community to bypass road closures or traffic crashes. Plus, the environmental impact, and financial impact of the extra fuel needed to drive many miles out of the way to head North or South from Okeechobee to Northlake should be considered. The extension will also alleviate traffic through residential areas of the acreage and Seminole Pratt Whitney			2/12/2020 19:18

Support	Michael	Gardner	I fully support the State Road 7 Extension be immediately be placed back on the Long Range Transportation Plan and be a priority project. I am very disappointed that this project was removed in the first place. The Ibis community and the City of West Palm Beach have be vigorously opposed to his project without any concern for the heavy impact it will have on the sorrounding communities. Already, The Acreage has traffic leaving the northern end of SR 7 and cutting through our neighborhoods, to get to Northlake. Ibis was permitted to be built, with the understanding that SR 7 was going to be extended to Northlake and for this alone, this project should have NEVER been removed from the LRTP. The Ibis community knew SR 7 was going to be built, when they purchased their homes. Ibis and The City of West Palm Beach are ignoring this fact and only serving to meet the wants of a few residents. I strongly urge the TPA members to please not be swayed by the selfish arguments presented by Ibis and the City of West Palm Beach and restore the State Road 7 Extension project to the LRTP. Support	DONNALEE	PEDERSEN	Please connect State Road 7 from Okeechobee to Northlake Blvd. Shocking that this has not been finished yet. We people out in Loxahatchee and the Acreage NEED this to be finished. Building keeps going forward with no new roads. It will alleviate congestion, improve emergency response, give us an evacuation route, end some commercial traffic in our area and help with the cut through traffic in the residential areas. Support	Virginia	Standish	I support the extension of State Road 7 for the following reasons: 1. It was a requirement for the development of Ibis. 2. State Rd 7 is an existing major north / south corridor with multiple lanes. 3. WPB concerns about environment are questionable. WPB has pipes coming out of the ground in Grassy Waters that allow gas fumes from dump to vent and be burned. WPB pulls its drinking water from lakes that are surrounded by major highways with road waste runoff. 4. Dr. Bill Louda, Enviromental Professor at FAU has offered solutions to help with environmental concerns.	15410 North Road	Loxahatchee	2/12/2020 20:44

Support	Donna	Eldredge	The extension needs to be approved to quickly, efficiently, and immediately move commuters from the area in case of weather emergency or road closures! We need multiple ways to redirect when necessary. About a year ago a major occurrence happened on Northlake Blvd. The police did not allow vehicles to move and soon made us all go down a side street. so many drivers became lost and frustrated. Access needs to improve North to south and east to west. Too many dangers exist...canal, dead end streets, unpaved roads , and in time of emergencies unfamiliar drivers in the area; not to mention, the ever increasing population!			2/12/2020 22:35

Support	Yvonne	Moritz	<p>For the residents of Ibis who oppose the SR-7 extension, it is a NIMBY issue. They do not want the sound/sights of vehicles in the distance.</p> <p>For the city officials voting from other areas who are not familiar, please understand that traffic will continue to flow North/South but without the extension will funnel onto Coconut Blvd which puts traffic directly into FRONT yards through a residential neighborhood.</p> <p>Front yards that children play in. Front yards with animals. Front yards that residents have to attempt to pull out of their driveways into traffic in.</p> <p>Coconut is heavily congested already but with the added population from Avenir and Minto, will become unbearable and dangerous without the SR-7 extension.</p> <p>As you vote please understand the dynamics of the Acreage and the consequences of that vote. By voting against the extension, you will literally be costing LIVES. The Acreage is a residential, equestrian, agricultural community that is not suited to handle that kind of traffic. (Remember that traffic comes from communities that were approved to be built, with SR 7 as part of their traffic plans).</p> <p>You simply cannot endanger lives in exchange for NIMBY. You simply cannot put this kind of traffic in FRONT yards, mere feet from homes that children live in. Please do the right thing and vote to keep the extension of SR-7, as was always planned and in the books because it is needed. Thank you.</p>	13547 85th Road N	West Palm Beach	2/13/2020 6:30

Support	Gary	Bass	I am all for the extension of SR 7. As of now all trucks hauling heavy loads from the west on SR98 use Seminole Pratt north to Northlake Blvd to access Beeline and I-95. Seminole Pratt has already had repairs done around most of the man hole covers due to heavy truck damage. Also this traffic is cutting through Loxahatchee groves, the Acreage and newly developing West Lake. To divert this heavy traveled route the extension of SR-7 would eliminate this problem. Safer travel for residents through the community and less damage to the roads should be a priority as well.	17725 69th Street north	Loxahatchee	2/13/2020 7:44
Support	Angela	walton	<p>Please can you put the extension of SR 7 from 60th S N to Northlake back onto the planning schedule.</p> <p>I am sure you are aware about all the new housing developments that are going on in this area, and the huge impact all this building will have on the existing roads. Extending SR7 will give the area another North to South route which should ease some of the traffic problems we are going to have in the future.</p> <p>This extension has been on the agenda for a long time, and, from what I understand, it was a condition of the IBIS Golf and Country Club community being built.</p> <p>IBIS Golf and Country Club claim that this extension will pollute Grassy Waters Preserve - but it turns out that for years the IBIS Golf and Country Club were the ones polluting Grassy Waters Preserve with phosphorus contamination from fertilizer.</p> <p>As quoted from a Dec 2019 news article - "The TPA vote was the latest setback for the county and state in the ongoing dispute. Last year, the city reached a deal with the Northern Palm Beach County Improvement District to pay 85 percent of Northernâ€™s cleanup costs for phosphorus contamination from Ibis Golf & Country Club fertilizer.</p> <p>In return, Northern agreed to deny permits for the four-mile road extension sought by the state and county to bisect Ibis and the preserve." At the time, McKinlay called the pact â€œnothing more than a bribe disguised as a legal settlement.â€</p>			2/13/2020 7:45

Support	Stacey	Willson	As a resident in the Acreage for over 20 years, I've witnessed tremendous growth, yet our roads have not aligned with it. It's imperative we have St Rd 7 extension to not only relieve the traffic flow off of Coconut Boulevard, but for safety reasons. If Northlake Boulevard is closed due to an accident, we have no other exit other than Coconut Boulevard. It is unwise & unsafe not to allow this extension.			2/13/2020 8:22
Support	Richard	Heinl	I support state road 7 projects. It is long overdue!	16115 East Hialeah Drive	Loxahatchee	2/13/2020 8:23
Support	Michelle	Brennan	We support SR7 going thru to Northlake. Without this, the already overcrowded streets in the area will be filled with more accidents and even deaths because it's too congested. Too many people in a small area and not enough ways out of the area. Please let this project go through!!	76th rd n	West palm beach	2/13/2020 8:23

Support	scott	sprague	travel on existing roads in the western communities is terrible at best,, and the only northern east west corridore is northlake blvd,, it is always backed up, always has accidents, because of the constant congestion on the road,, and if there ever was a emergency in the western communities of loxahatchee, and / or westlake , and lets not forget to mention all the new communities being built on northlake now,, there would be anarchy and mayhem on that road alone,, and the issue of the residents of ibis and the other communities, should not be aloud to dictate road authority of other communities west of them,,, the city of west palm beach is a dictator community as it is,, it controls all the water run off in the western communiteis because of the canals that run from them into the city,, and a 1/4" a day for run off in a water emergency is equivalent to the amount of traffic on northlake to the amount of water the city wants to control,,, there are only two east west corridore roads out here southern blvd and northlake,, okeechobee doesn't enter into it because it will only be a 2 lame road with a 30 mph speed limit,, we need the widening of northlake now not when the city of west palm beach decides,, all the studies have been done, and plans approved it needs to be done asap	17430 69th street north	loxahatchee	2/13/2020 8:52

The traffic is bad already on coconut Blvd. Are you guys really gonna direct all that traffic through the neighborhood and to coconut Blvd? Support	Eric	Jourgensen	The SR-7 extension going through to Northlake is long overdue. It's been in the plans for decades. It is needed for the western communities both to ease congestion and for emergency services. When the road I live on, Persimmon Blvd, was connected to SR-7 we were promised that the road would go through to Northlake to ease congestion on our road. That has not happened. Traffic enforcement on our road has not happened. The stopping of semi and dump trucks on Persimmon has not happened. Please follow through with the promise that was made to our community years ago and put the road through to Northlake Blvd.	11448 Persimmon Blvd	West Palm Beach	2/13/2020 9:19

Support	Tatiana	Rivera	Please extend (441) St. RD. 7 ALL the way to Northlake Blvd. And keep the traffic out of the Acreage, which has family homes already too close to the only roads in and out of our town.			2/13/2020 9:31
Support	Bernadette	Chiosie	My husband and I decided to buy a home in loxahatchee when we retired in New Jersey 5 years ago. What brought us to Loxahatchee ? The quiet , the beauty , not many traffic lights , the sanctuary land and we're only 25 minutes to the beach . Last week I went to the beach . IT TOOK AN HOUR !!! Between added traffic in loxahatchee and ancient tree on Northlake it just crazy . We have enough traffic !	15703 72nd ct n	Loxahatchee	2/13/2020 9:33
Support	Carol	Whitworth	Please approve the extension of State Road 7 to Northlake Blvd since the traffic is already horrible and will be worse with additional houses being built.	14865 Drafthorse Lane	Wellington	2/13/2020 9:33

With the number of homes being built the roads are horrible overcrowded with accidents daily.	16244 East Lancashire Drive	Loxahatchee	2/13/2020 9:38
Support	Kaitlyn	Iwasz	Please allow the extension of SR 7 to ensure the safety on well being of every current and future resident of the western community. It is horrible that they allow Ibis Country Club the rights to dictate the well being of thousands of people because they do not want to expand with the rest of the county. Shame on the politicians for letting money and power overrule the safety of thousands of lives.	16011 Whippoorwill Circle	Westlake	2/13/2020 9:38
Support	Janet	Ervin	Please add the SR 7 extension to road improvements that need to be accomplished in the near future. We need other routes to and from the Acreage for not only safety reasons but growth.	16087 Whippoorwill Circle	Westlake	2/13/2020 9:40
Support	Pamela	Taylor	Please allow the extension for SR 7 to go to Northlake Blvd. As a resident of the Acreage I see how dropping off at 60th has turned Royal Palm Beach Boulevard, along with Coconut Boulevard into the SR 7 extension. For safety purpose alone this makes sense to have another north/south exit for the many people who currently live here, as well as the many that are building now. Understanding that we are Unincorporated Palm Beach County doesn't mean we don't have a vote.	12684 70th Pl N	West Palm Beach	2/13/2020 9:41
Support	John	Condon	I approve of the extension	13309 48 Court North	West palm beach	2/13/2020 9:48

Support	Debbie	Zimmerman	I have lived in the Acreage for 26 years and have seen the changes over the years. The roads cannot handle the amount of development out here. I have been stuck in traffic on Northlake and also the beeline. The only way around when there's a massive backup is to go all the way over to Okeechobee Blvd. There needs to be another way in and out of the Acreage. The State Road 7 expansion is something that must be put back in the plan and approved. I truly do not understand how members of this board, who do not live in the Acreage, can be allowed to vote on a project that does not concern them. Members of this board should spend a week traveling these roads, then come back and tell us it's not needed. The on-going development on Northlake and the new city of Westlake should never have been approved without approval for a new road.	17730 75th PL N	Loxahatchee	2/13/2020 10:27

Support	Charles	Brown	The county wrongfully approved the construction of major housing and cities without the completion of roads to handle traffic on any day much less in emergency situations. During the recent hurricane seasons getting away from a deadly storm was bad enough on the major highways and roads. Now you are adding thousands of more homes and residents to the equation. The expansion of roads must be approved and completed before anymore housing construction is completed. Please think about the lives you will be saving by fixing the problem now. Complete the extension of state road 7 and widen the roads to handle the new traffic additions.	16932 79th ct n	Loxahatchee	2/13/2020 10:35
Support	Jona	Muckle	Please continue SR-7 extension to Northlake Blvd. This is a necessary roadway, as there are already tens of thousands of residents in the acreage/Loxahatchee area with tens of thousands more to come in the next coming years. There is currently very limited access roads. Please be responsible representatives to our county!			2/13/2020 10:35

Support	Karen	Darter	SAFETY SAFETY SAFETY...This is my main concern...The roads are already overcrowded and it takes sometimes 1.5 hours to get to downtown to work. I moved to the Acreage knowing that it would be a longer commute to work and I'm ok with that but, an 1.5 that's ridiculous. Where there is an emergency there will be such a gridlock that no one will be able to get in or out of the area. Please put the extension back on the county plan. It's a necessity not an niceity...	13425 82nd Street North	West Palm Beach	2/13/2020 10:48

Support	Robin	Johnson	This extension of SR7/441 would be such a beneficial project for the county to pursues. The inflow and outflow of traffic to loxahatchee and royal palm only has Northlake, Okeechobee Blvd and Southern to use. And most of residents that live west are stuck traveling these small road using either back roads or Seminole Pratt to commute to either of these major roads. This extension would provide another outlet for residents to safely and efficiently get in town to their jobs daily as well as provide a better route for accessing shops and retailers along these major roads. Traffic is already horrible as it is with only 2 lanes both directions on Northlake. With more homes being built, we need to provide better roadways for all the incoming residents and existing residents to travel on.	17217 tangerine blvd	Loxahatchee	2/13/2020 11:05

Support	Eduardo	Casillas	We are in need of that SR-7 Extension northbound to Northlake Blvd. Emergency evacuation traffic flow consideration alone should be enough justification for the extension of the. Oppose	Marcia	Caron	To who it may concern: I am writing to extend my support for the completion of the State Rd 7 extension to NorthLake Blvd. I have lived in BayHill Estates since 1996 and have seen the western growth quickly spiral up and with the new developments - Ancient Tree and Avenir in progress - hundreds more vehicles will be traveling on this road daily. I have witnessed many traffic accidents which have prevented traffic to continue on NorthLake and even necessitated being detoured. Detours have meant either going east to Okeechobee Blvd and through Royal Palm Beach to access Northlake from the west or having to go the opposite to access east roadways. Not only does this add mileage but also additional driving time to reach ones original destination. In addition, in an emergency evacuation, we have no other north/south escape routes except Seminole Pratt or Coconut Blvd through Royal Pam Beach. With the future addition of hundreds of more residences along NorthLake Blvd., there will be major traffic jams! One of the major comments being made in opposition is that the extension will run through the West Palm Beach water catchment area. What I clearly do not understand is how this objection can be made when hundreds, including the objectors, travel daily through the catchment area known as Grassy Waters Preserve; NorthLake Blvd divides this protected area already! (Interesting that those who purchased a home near this proposed extension were made aware of the proposal on the site plan of Ibis as this was clearly marked!) I strongly urge a vote to complete this road. Hopefully the needs of the greater majority will take precedence over the minority who live along the proposed extension. Now through an absurd abuse of power, it has been taken off the books. What if we all did that?! I think I'll go back on every contract I've ever entered into since that's OK. Oh and by the way the extension is beyond needed. If it doesn't happen and there is injury or loss of life due to this negligence I will be the first one in line to point a finger. The traffic on Coconut Blvd has increased beyond belief with thousands more houses being built in neighboring communities that will add to the problem. This road needs to go through now. For the rich and WPB officials to use environmental damage as an excuse is irrational. Count how many major roads run thru, over or along the city water preserves and this short section of St Rd 7 doesn't come close to that. This is all about the RICH controlling the traffic and noise no concern about our safety, or ability to get to a hospital quickly, or to our jobs faster with shorter driving distances, or to take the traffic off streets with homes with kids and pets. These RICH people don't work, most aren't here year round but they matter and those that lived out here 20, 30, 40+ years don't....the city of WEST PALM BEACH has wasted so much money to stop this for the RICH they failed to think about the residents of the Acerage and surrounding areas....and so many more developments are being allowed. Support	Geoffrey	Stoner	It's crazy sr7 has been taken off the books even though most of the development out here was approved with the understanding this road would be built. Now a few residents are holding an entire region hostage. Without sr7 there needs to be a moritorium in building anything more in the corridor. Traffic on northlake and coconut is absurd. To wind through the acre ridge to get south at 5pm gives you a 1/2 mile plus backup to turn left at coconut and orange. This road should have been built to PGA a long time ago. Let alone northlake. Ibis residents were aware of this road going on when they bought their houses. They should not be allowed to stop it. Noise mitigation berms can be built. They won't even know the road is there. As for environmental. The fertilizer runoff from all these new homes plus Ibis has more impact. If that is the real concern these communities should have never been built in the first place and we certainly should not be adding more development. Don't let the nimby people win. It's like people that move next to an airport knowing full well it's there and complain to have it shut down. Don't back down.	12405 86th rd north	West palm beach	2/13/2020 17:12

Support	Amanda	Therrien	Hi, my family currently resides in the Acreage and we are for the Sr Rd 7 extension to Northlake BLVD. Please help to alleviate all of the traffic that I spend so much of my life sitting in every single day. When there is an accident on Northlake, I can't make it to work and my family experiences a hardship due to this. There has to be more ways to travel to and from our community now that we have so many new developments such as Westlake and all the brand new ones off Northlake. It's bad now and they are still building so many new homes. If it doesn't get better, we will need to move out of the county. I was born in this county and that is the last thing I want to do but we need smart development here. Feel free to contact me.		Loxahatchee	2/13/2020 17:56

			The SR7 extension MUST be completed. The residents of the Acreage, Loxahatchee, and surrounding communities absolutely need another egress especially with the addition of Avenir, Westlake, and Ancient Tree. It is so frightening to think what Northlake will be like when those communities are built out as Northlake is already a nightmare on a daily basis. Not to mention if there is an accident; we have no alternate route! Please, please put the extension back on the plan where it was planned & promised so many years ago.

			The arguments against the SR7 extension make no sense in lieu of the EIA that was already reviewed & accepted by state & federal agencies. This road can be constructed in an environmental-sensitive way & is desperately needed in the western communities that have made development plans based on its completion. The neighborhood of Ibis has been much more disruptive to species & the surrounding wetland habitat, & that was never protested to the degree this road has been by those very residents. It's absurd - classic NIMBY argument by a wealthy neighborhood out of touch with the needs of surrounding communities. Please do the right thing & add this road back into the long range transportation plan.

Support	Maryanne	Sharp	The 441 Road extension is very important to the many current and growing numbers of future residents of the Acreage. The planning of all of the home developments were approved based on the 441 extension. If the extension doesn't go through there they and any future building need to be cancelled. There is limited emergency routes if there is a need to evacuate the Acreage. This could cause dire consequences if the need should occur.	12276 58TH PL N	ROYAL PALM BEACH	2/13/2020 20:50

Support	Theresa	Deimel	Please approve the State Rd 7 extension to Northlake Blvd. My husband and myself have been residents for 18 years and bought our property in the 90's. We live just a couple of blocks east of Northlake Blvd off of 140th . The growth we have seen in recent years in Loxahatchee/Acreage has increased our traffic flow. We have a commute that is now becoming longer especially on days when there is an accident on Northlake and there is no other way out. Now with the city of Westlake on Seminole Pratt Whitney to the west of us and the new Avenir community being built just east of us. The traffic will become intolerable for the residents who live here. Please put through the extension which was planned long before all old and new communities were built. This has been in the plans for years. Please give the residents that live here and those new residents that are joining us a here in the western communities a tolerable and commute. Thank you for your time and consideration in this matter that is so important to all the residents that live here now and in the future. We love where we live.			2/13/2020 21:10

Support	Kimberly	Bauer	SR 7 extension needs to be revisited. Northlake Blvd cannot handle the additional traffic, nor can Coconut Blvd or Orange Blvd. When all the new housing developments were approved it was based off an additional road, (SR7) being utilized. Given that SR7 is not a operational roadway. The safety of the Acreage, Ibis, Ancient Tree, Bay Hill Estates & Osprey Isles just to name a few residential areas the residents safety is now a concern, if our first responders (fire, police, and EMT) can not travel safe along Northlake; because it is our only direct west to east road way, no alternative to the north and to the south you have to travel on Coconut (1) lane. Please keep in mind children and school buses are also on Northlake Blvd and Coconut Blvd.	15441 93rd St N	West Palm Beach	2/13/2020 22:10
Support	Gary	Maddox	I am a Palm Peach Co. resident who has lived in Northern Palm Beach for 42 yrs and in the same North Palm Beach house for 28 yrs. It is vitally important you begin the construction of the SR-7 extension from 60th Street to Northlake Blvd right now and override this West Palm Beach nonsense. For decades I watched the County and City of West Palm Beach turn publicly paid for North/South connecting roads to NorthLake Blvd into private gated community drives. I still remember in the 1980's when Haverhill Rd was a public road open to all and connected all the way to NorthLake Blvd. Somehow it was allowed to be turned into private gated drive by County Commissioners who sold us all out for some Steeplechase votes and political donations. Next I watched Ryder Cup Blvd thru the PGA development slowly go from a planned 4 lane public connector road to another private road with guard gates and limited hours. Why are you people sitting back and letting the County, City of West Palm Beach and PB Gardens take our roads away. Enough of this nonsense its past time to do something about this traffic problem. 			Having lived in Loxahatchee/The Acreage for 25 years, I've seen the need to have SR7 extended more many years now. Given all the new development that has been approved in our community, the need has never been greater than it is NOW. While there many road improvements that would assist our area in an emergency evacuation and daily commuting, the extension of SR7 from 60th to Northlake is perhaps the most important. Please consider our community's needs regarding this matter.

			The lives and safety of this community depend on making sure the the State Road 7 Extension is allowed to connect to Northlake Blvd. Our rural area has exactly two major access routes to our community that can be easily be blocked by natural disaster. The SR7 extension adds a third route to evacuation and safety should a natural disaster occur. Exponential growth in our surrounding community is exasperating this issue, and it is only a matter of time before a significant crisis occurs that could have otherwise been avoided. The current argument against the extension due to environmental concerns is irrelevant. The conservation area in question is already surrounded 85% by roadways and areas that have proven mitigation strategies for the dangers they are protesting against. The truth is that IBIS, a multi million dollar community is leveraging their political weight so they don't have their personal roadway taken from them, and they don't want to be irritated by the noise and traffic of a connection to our southern neighbors that everyone in the western communities knows is desperately needed. Do the right thing. Support the SR7 connection to Northlake. Make THOUSANDS of western community voters happy.

Support	Jane	Beck	It is both foolish and irresponsible to expect the increase in proposed traffic to be absorbed into the current road situation. To table the plans for the extension is tantamount to signing a death warrant for the victims you know are going to happen. On a more practical level, letâ€™s appeal to your pockets. The cost of maintaining the roads that will be expected to take up the slack will far outweigh the cost of completing the project.	16190 61st Pl N	Loxahatchee	2/14/2020 6:34

They are there bc traffic at the end of reliever road spills them there while they drive to Northlake. If roads can't accommodate the traffic we already have & there is no additional safe passage relief, then Please Halt All Construction until a plan is set. It Is A Matter Of Life and Death. Fire Rescue can't cut through rush hour traffic, and there is no alternative route for them. Please Help Us, Please. Oppose	Lois	Reich	I oppose any plan to build State Road 7 through and/or near the Marshlands and West Palm Beach water area. For environmental reasons, this land is too valuable to be exposed to potential hazards. This is true now, and certainly will be true 25 years from now. By that time, the availability of clean water and access to it will be a huge issue worldwide. As our climate continues to change, scientific predictions emphasize that drinking water will be a shrinking commodity. It will be an extremely valuable and necessary resource. I cannot fathom why you would contemplate building anything that would jeopardize our water. In addition, the areas are breeding grounds for many species. As many species are becoming extinct, it is important to do everything we can to save these species.	7995 Via Villagio	West Palm Beach	2/14/2020 13:06
Support	Kristi a	Picciotti	This extension is final to reducing traffic and accidents in this area. The traffic congestion is already out of control and with the building of more new homes will become an even larger problem. We certainly have plenty of routes to and from places this road currently goes, and the extra lane is not at all necessary. They signed multiple builder's agreements to allow SR 7 to go through so they could build Ibis, Riverwalk, Androse Isle, and Baywinds Estates. They reneged on every one of them. They got the tax base, the Acreage and the other western communities got their traffic. WPB crying about the environment is disingenuous. They destroyed 360+ pristine wetland acres to build multi-million dollar homes for the rich in Ibis. 			I would like to express my complete and total support for the SR 7 projects. With the addition of the many thousands of homes in the area along Northlake Blvd and the town West Lake, the current infrastructure is not adequate to support the additional traffic. The SR 7 extension will provide an alternative route for commuters and will relieve some of the congestion on already over-crowded roads such as Coconut, Orange, and Royal Palm Beach. The Mayor's past arguments concerning the Grassy Waters Preserve is ridiculous as there are measures that could be taken to prevent these overly dramatic suggestions of tankers running into the water. Any runoff from the roadway will not contain anything worse than what Ibis has already been polluting the Preserve with for years. This all boils down to the ex-Mayor not wanting the extension to run by her neighborhood and the money of Ibis spoke to the politicians. It is time that the politicians in Palm Beach County stand up and do what is right for the western community and not just be manipulated by one neighborhood. With the additional traffic that will be on Northlake on a daily basis, people will rethink purchasing in these new neighborhoods due to the overly congested roadways and property values will decline which means tax revenue will also decline. Please allow the SR 7 extension to be completed for the future of Palm Beach county residents.

			In this period of global warming, when we are supposed to be making every effort to to save the planet, it's unconscionable to propose building more roads and adding tons of concrete, to further heat up the atmosphere. Also, to place the drinking water and our Preserve in jeopardy, is extraordinarily heinous. This is all about big money. If that is the case why do residents use the road everyday?? Are there cars different from others? They should be more concerned with Northlake and the down the middle of the catchment area and the dump to the east. The neighborhood roads in the Acreage are being over taxed by all the cars from the city of West Palm Beach and Palm Beach Gardens using them as a cut through. And with all the new developments approved by the above mentioned cities our roads will be gridlocked. This is not only a traffic nightmare but a safety issue. Oppose	Toni	Leben	<p>The Grassy Waters Preserve is THE source of fresh water for the City of West Palm Beach and the towns of South Palm Beach and Palm Beach Island. It supports the homes, business, and industry of these vibrant communities (with a year round population of over 100,000- which expands significantly during "season"). Any damage to that supply has the potential to cause irreparable injury both to the ongoing lives of the residents and to the economic viability of this area.</p> <p>State Road 7 wraps around the perimeter of the Preserve, and in places rests on a twenty-two foot raised, unlit roadbed that contains two sharp, angled turns. Any accident causing spillage seeping into the preserve will contaminate the water. Heavy rains as they wash toxic debris and chemicals from the exhaust of traffic into the delicate wetlands is also a potential cause of damage. The Army Corps of Engineers after its study of the State Road 7 plans has voiced concerns about the selected route, and has suggested alternate routes to the west.</p> <p>Once the bell is rung, it cannot be undone. We all want to see our area flourish, but smart growth and planning for the future with due consideration for the need to protect our not unlimited resources must be our highest priority.</p> <p>Thank you for your time and consideration,</p>	8437 Quail Meadow Way	West Palm Beach	2/15/2020 13:32

Their passage was what was promised the citizens of the Western Communities when the Commission voted to approve the addition of many new communities, such as Westlake. Understand that to many residents that have been here since the 80's...change from a rural setting was not why we moved here. However, that disappointment was mitigated by the fact that the traffic was being considered and taken care of. If plans TPA013 and TPA014 are not put into motion, how on earth are we expected to drive anywhere in our area? You simply can not approve new construction with no thought for the infrastructure to support those who must go to jobs, schools, hospitals, or places of other business. Support	Colton	Pursell	The road will allow easier access to Wellington without needing to go down northlake though coconut and down royal palm only to have to take another side road to get to state road 7. This will also allow for more businesses to bloom as transportation from anything in wellington or too Wellington will have its time cut down almost by half. It will cost money but in a long run is beneficial. I only wonder about traffic safety, how many lanes, infrastructure for drainage and emergencies as well as speed limits being to fast or to slow.	11472 83rd Lane N	West palm beach	2/15/2020 20:40

The counsel people who voted for this development should be removed from office since the only thing they cared about was their back pockets. What is happening to Palm Beach county is exactly what happened to Miami/Dade and Broward counties, tooooooooo much development. Now it is very difficult to travel in those counties. Support	Thomas	Murphy	The way this roadway was removed just shows how corrupted this county's politicians are. there are so many agreements to have this road built and now you want it removed because of a small minority doesn't want in in their neighborhood. The majority of the population need and want this completed. Everyone who has lived in this area knows it is needed and needed now. All studies have proven this to be true but this small minority has manipulated the system to prevent it its time for the state and county to serve the majority for safety reasons. All reliever roads were planned for a reason with much thought and study to serve THE GREATER AREA of RESIDENTS and not be deterred by a single NIMBY group that has polluted the very area they say needs protection. It's time to be fair to the majority. Build the roads that have been agreed upon in past negotiations!!! Completing State Road 7 to Northlake as was contractually promised by IBIS will be a Godsend to those commuters that will be able to alleviate traffic by using St Rd 7 south into the eastern portion of The Acreage. Support	Lori	Goobeck	Hello, The need for the extension of SR7 to Northlake is very much needed due to the amount of new homes being built in the East side., The royal Palm Bach Blvd to 130th area. Traffic is backed up during rush hour, any accidents that occur brings the flow to a complete stop. On the other hand, the extension of 60th West to West Lake, is totally a mistake by bringing all the traffic through residential homes. These homes have been here years, and again the congestion and any accidents that occur would bring a complete shutdown of flow. What happened to the safe neighborhood for horses? 			Please expand SR7 to Northlake, I live on Northlake Bv and feel this expansion is vital for traffic movement North/South. The traffic is already bad now especially during rush hour due to very limited options for going East/West or North/South. This expansion would greatly lessen heavy traffic now and when Avenir comes into play.

			I support the State Road 7 Extension. We need that here in the Acreage. We are essentially landlocked without it, and an emergency could end up with tragic results. In addition, cut-through traffic is already endangering lives (drivers, pedestrians, pets). And I consider it ridiculous that a few (and I mean a very few) residents of IBIS, as well as County Commissioners who would appear to be on the "money side" of the argument, can push their agenda to the detriment of the greater majority of Acreage residents.			
			I ask that you please support this Amendment.

			As a resident who uses the turnpike daily, state Road 7 is the best alternative when there is an accident or other obstruction on the turnpike. The lack of lanes north of Okeechobee and the round about way you have to go north when SR7 ends just causes additional backups and delays. Support	Paul	Kobis	We have lived near Coconut Blvd in The Acreage area for 16 years. We moved here when our children were as young as 8 months old. We have supported the State road 7 extension since the beginning, in large part to ensure a safe environment for our children to grow up in. We've watched over the years as the traffic has become increasingly congested and unsafe. More and more homes went up and developments approved, but no roadway approval to accommodate that growth. The traffic on Coconut Blvd. is dangerous. Many times, working in my yard, I've heard the skids and waited for the inevitable crash and crunch as yet another head-on collision occurs at Temple and Coconut. Too many to count, frankly, just at that one intersection. How many would have been avoided in 16 years had a previously planned and approved roadway been built? Well, 16 years later, while our kids are headed to college soon, still no SR 7 connection to Northlake. The completion of this SR 7 should have occurred years ago. For the safety of our community, and the future generations of families with children near these dangerous roads, let's get this common-sense roadway approved and built. It's well past time.	12376 77th Place N.	West Palm Beach	2/17/2020 13:59

Further, community opposition to this project is longstanding and has wide support throughout the State of Florida as demonstrated by the Everglades Coalition's adoption of a resolution in opposition to the extension attached hereto as Exhibit A. 1000 Friends adopts the Everglades Coalition's position in opposition to this project and further states:</p> <p>I. History of the Proposed Project and Legitimate Longstanding Opposition</p> <p>Concerns by the public, local governments, and non-governmental citizen organizations over this proposed extension have been documented consistently since the inception of the project. Support	Barbara	Susco	I sold real estate-maily vacant acre lot-in the Roayl palm Bch acreage for 40 yrs starting in 1978. Royal Palm Beach Blvd was the only access! The county has cheated the residents out of ingress and egress long enough. We need State Rd 7 extended to Northlake Blvd. not only for the acreage but also, in times of emergency, a route to evacuate from Wellington as well. In the 21st century there is certainly technology to prevent runoff to pollute the West Palm water supply. I guess enviros haven't hear of berms. Support	Ron	Begleiter	It is absolutely imperative to approve the state road 7 project. Traffic is a problem already and every single one of us knows especially with the development of Avenir that without that necessary infrastructure, It is going to be near impossible to commute East and West. 4000 new homes, 2 million square feet of office space, 400,000 sf of commercial space, and MUCH more. Westlake, Ancient Tree, Medical Office complexes and other plazas in the pipeline between Ibis and Coconut. Widening only a portion of northlake west of Beeline is going to literally do nothing with this kind of development already beginning. It will be an absolute nightmare with one way in and out and a huge problem if we dont approve and work on this project simultaneously. This must be approved and I think that is more than obvious to anyone having to make this decision. There is already a ton of traffic heading east during rush hour and west heading home. Without it, it will feel like Los Angeles on this road. Residential areas and small Loxahatchee roads will be bumper to bumper. It would simply be wreckless to approve development of this nature (essentially a city,) without the approval of this project. Please do the right thing.	9654 osprey isles blvd	Palm beach gardens	2/17/2020 20:21

Support	Helena	Reid	I don't know who is responsible or why those in the Acreage are being prevented from having clear and openly accessible roadways to and from where they live. It makes no sense. We simply want to drive to and from the Acreage easily and without major stress. Once Minto on Westlake, and the 2 new developments on Northlake are fully functioning the roadways are going to be gridlocked, particularly if there is a major catastrophe. Let's learn from other catastrophes and avert the disaster before it happens rather than wait for a catastrophe to change something. The injustice of it all makes us feel as if we have been jailed for the wrong murder. We moved out here when permits were in place to build the road....let's build the small extension we would like without and further time and money being spent on West Palm attorneys for the benefit of the few.	16976 77th Lane N	Loxahatchee	2/17/2020 20:49
Oppose	Aaron	Wormus	The SR7 projects continue the trend of the "Browardization" of Palm Beach County. Which I strongly oppose. More roads, bring more people, bring more roads. With every cycle we loose more of our precious natural area. To what end? Please stop the madness.	330 Winters Street	West Palm Beach	2/17/2020 21:06
Support	Paul	Reid	The back door deals to shut down an already approved SR 7 extension is crooked! The amount of money and effort put into keeping this road from being built it could have been built multiple times. The Road would actually ease traffic through our residential streets and alleviate the traffic volume in front of Ibis.(the main villian in this crime) when there is an accident on Northlake there is no way out of the western communities. We need more connector roads! Now our roads are jammed with construction vehicles and dump trucks servicing the new communities. When are they going to sort this out? We feel like the red headed step-child. We need better than this! We need SR7 and more!	16976 77th Lane N	Loxahatchee	2/17/2020 21:11

Support	David	DeGasperis	As with any commercial development, infrastructure progress will always be needed, State Road 7 is no exception. In a short time the land mass west of Bee Line Hwy will have a population explosion. With Northlake being the only viable roadway to exit this area in case of an emergency evacuation it is imperative our city officials stop being reactive and start being pro active. I will use a common phrase that applies to this situation, "The needs of the many outweigh the needs of the few". So lets start focusing on what's right and exercise some common sense.	11115 Rockledge View Dr	Palm Beach Gardens	2/18/2020 9:54

Support	Susan	Azzarello	We desperately need this road to be built. Traffic out in the Acreage is horrendous. Shame and those who are Opposed to having this road built. You people don't live out here so you don't know what the traffic is like and you probably really don't care either.	11224 Sunset Blvd	West Palm Beach	2/18/2020 11:41
Support	Richard	Gallant	The SR7 needs to be completed immediately. This has been in planning for way to long. This road section was promised when Ibis was built. The opposition is complaining about environmental issues that don't exist. If they were so concerned with environmental issues they would have never let Northlake be expanded, or Jog Road built, or Haverhill expanded or any other road surrounding the 'preserve.' They are using this excuse to prohibit those who live west of Ibis to have an alternate route. This project needs to be fast tracked for the safety of the residents.	15439 95th Lane North	West Palm Beach	2/18/2020 11:42

Support	Philip	Yeager	SR 7 extension is needed because of unchallenged growth throughout the county! The single most important reason it should go through is school bus/student safety! As a veteran who uses the current Royal Palm Beach Blvd to Orange to get to the VA, I have seen so many unsafe student pickups and drop offs made more unsafe by the current two lane road situation and impatience of drivers. It is too late to worry about the environmental impact of this road, that shouldâ€™ve been considered when local politicians took money from developers and allowed for such great expansions! With the additional tens of thousands of new homes being built without proper planning for traffic, the local wildlife was doomed long ago! At this point the best you can do is elevate the new road, fence it off, and provide a way for wildlife to transition under the new road, and keep lights to a minimum and limit future development and punish politicians who continue to get rich from developers! Iâ€™ve lived here a long time and can remember being harassed by PBSO for riding bikes with my children in so called â€œenvironmental areas, nature preserve â€œwhere the Wellington Green Mall and the shopping center where the current hobby lobby location on 441 are! You corrupt officials took money back then, now give us roads that will ease congestion to alleviate what you allowed to happen!	12339 Stratford St	Wellington	2/18/2020 16:20

The extension poses no more danger to grassy waters than Northlake between beeline & Ibis. i do not believe this extension would increase the number of cars through area, just provide a much needed improvement of flow through the area.			2/18/2020 17:29

Oppose	Margaret	Shoemake	I am opposed to extending SR-7 if it means going through Grassy Waters preserve or any other water or nature preserve. We need to protect our environment. Where roads are built trash is thrown. We do not need the water flow blocked and trash in the waterways. Please consider this when deciding where roads are going to be built. Palm Beach County has done a terrific job of protecting what little natural resources we have left. Support	Joyce	Demain	I live in Ibis and I think we need the State Road 7 extension. We have 1 way out of here and if it is blocked by traffic and/or and accident, we are stuck. State Road 7 would provide us with another exit. The traffic here during rush hour is terrible, and with all the building west of here, it will only get worse. Something must be done. When there is an accident or incident that ties up Northlake, it is virtually impossible to get out of our neighborhood, or if we happen to be out, to get home. We need improvements to SR 7, and SR 7 should be extended to Northlake to provide an alternate path to the western developments. I do not understand how all the new developments such as Avenir were approved without this extension. We have a very unsafe situation on Northlake right now because there is no alternate route to the south other than the Beeline Highway.	7691 Maywood Crest Dr	Palm Beach Gardens	2/18/2020 18:21

Oppose	Melissa	Gomez	As a Social Worker, and Palm Beach resident, I vehemently oppose extending SR 7 along Grassy Waters Preserve. I just moved back to my native Florida from Los Angeles and have experienced firsthand the effects of smog mostly due to cars trapping fumes into the atmosphere; the air we breathe. In my time in Louisiana I saw the devastating effects of oil spills/oil rig explosions harming water supply (also having several water boil advisories yearly), and poisoning of plant and animal life. At this time, I am unaware as to particular vehicle emissions regulations/guidelines enacted to protect Florida's precious ecosystems. Therefore, it is imperative to evaluate the severe consequences this may present to vulnerable ecosystems, especially water sources Palm Beach residents rely on. We and our children bathe and drink water from Grassy Waters Preserve and must do anything we can to protect this vital water source from human devastation. Although proponents view extending SR 7 as a majorly convenient way to commute, a solution must not be at the expense of a vulnerable 23 mile stretch of wetland in which we and our children depend. In addition, solutions regarding city planning, particularly another route should have empirical research, and participation from public forum, to demonstrate to Palm Beach residents the "pro's and con's" in order to make safe, and informed decisions. Other options should be explored and proposed in order for decisions to not be made on a superficial basis other than "this would be more convenient". I am proud to be a Floridian, and part of being a proud Floridian is being proud of the beautiful lands we are blessed with. Please consider prioritizing us and our children's wellbeing, our environment, and prioritizing Florida as trailblazers in standing up to Climate Change.	1527 S. Support	Rhonda	Johnson	This extension is well overdue. It simply is called evolution. Not only will it help ease congestion on Northlake, but also on Coconut Blvd. There are days we are unable to either turn into or turn out of our own street onto Coconut for over ten minutes, unless someone is curious enough to pause to let us out. This is simply ridiculous. Times are changing and traffic has exponentially increased in the last fifteen years.	12686 71st PI N	West Palm Beach	2/18/2020 18:35

			I have been living in Royal Palm Beach for 37 years, and have seen an explosion of growth in that time. I have seen major east and west bound roadways expand to accomodate the traffic that now, most time is bumper to bumper at peak time during the morning and evening hours. What I have not seen is the north and south bound roads in the western area improved. The acreage area has almost been built out, and areas to the west, Arden, West Lake, adding to the increase in traffic. It is time to complete the extension of SR7 from 60th street to North Lake Blvd. The constant argument from West Palm Beach officials is that it will affect their water catchment area. Well building Ibis wasn't an issue to the environment of their water catchment when city counsel and commissioners wanted it. Oh my don't disturb the snail kite from it's nesting area, but they built it anyway. And lets not forget the several gated communities along Okeechobee Blvd, all of which back up to the catchment area. And the want to block a two lane road, that would help traffic flow better and help emergency responders. Part of the extension already exist running south off of Northlake now, so I can't see that a 2-3 mile extension to complete this needed connection is going to affect any more that what West Palm Beach has already built on their catchment area. And yes their catchment area is also on the north side of Northlake Blvd, isn't that enough water?

Oppose	Nikki	Descoteaux	Dear Transportation Planning Agency: I am writing in opposition to any extension of State Road 7 that would take it near Grassy Waters Preserve. This is a critical drinking water source for West Palm Beach. We need to protect our water sources as a priority. Why extend roads and encourage more traffic? That just compounds the infrastructure, traffic and pollution problems we already have. I support expanding our public transportation system which falls woefully short of getting people out of their cars and onto mass transportation. Most of us can't get from point A to point B reasonably on buses and the like. Better transportation is what we need, not roads that increase automobile traffic. Last month, Amy Baker, director of the Legislature's Economic and Demographic Research office presented her annual assessment of Florida's water resources to the Senate Environment and Natural Resources Committee. Baker warned that by 2025, "we expect that the forecast of water demand will exceed the water available" an inferred water supply problem. Baring this in mind, why take the chance of creating additional water resource problems by putting a highly trafficked road near a major water supply of our county? We need to use common sense, please. Thank you for your consideration.		Boynton Beach	2/18/2020 19:16

Support	Sandra	Hancock	Hello, I have lived out in the western community since November 1991 after leaving Broward County due to over crowded roads and highways. I have seen a lot of change to our area, some great while others no so good. The western area is growing in leaps and bounds but it seems that the county/cities have not thought ahead to the road system. More and more housing developments are being built without widening the roads or building other access roads. We are in great need of other access roads for this area to do the growth and development in western West Palm Beach. It is crazy busy or should I say a stand still on our current roadways now especially if there is an accident. Please look very carefully at the growth of your western cities and approve this extension of SR 7. It is way overdue. Thank you for your time on this matter. If there's construction or an accident on Northlake people have to drive back towards turnpike and down to Okeechobee to come back up. Fix this problem. Support	JOHN	HERZOG	THE EXTENSION OF STATE ROAD 7 TO NORTHLAKE BLVD SHOULD BE PUT BACK ON THE LONG RANGE TRANSPORTATION PLANNING. THIS ROAD SHOULD HAVE BEEN EXTENDED A LONG TIME AGO! Oppose	Nadine	Interlandi	Good day, I am writing to give my vote against the Proposed Extension of State Road 7 to Northlake Blvd. There are many reasons, such as the Preserves, Endangered species, our Natural Wildlife. Some say Help Conditions, but what got us in these conditions, and what was said would not be affected if these homes, businesses etc. as such were built would not happen, be affected. But back to Help Conditions? And then harm cause harm in others areas, please look at that. Thank you for your time and consideration. By the way, the email on the website for TPA was wrong?"PalmBeachTPA.ORG/LRTP"			2/18/2020 20:00
Support	Andrew	Moritz	This road needs to be built, its a safety issue. This connection of Sr 7 and Northlake was in the permitting for the ibis community years ago. 			<p>I think the extension is important for traffic and growth, currently, we only have two ways out of this area, Northlake west to Coconut or east to Beeline. I commute to work and Northlake is a nightmare, going and coming home. I understand the environmental concerns and the extra issue of the drinking water supply flow through the area. But you have Northlake Blvd. cutting right through a large part of the north-south flow and the traffic is even heavier than expected for the extension. I think the extension can be built with the safety of the watershed in mind, I have seen it done in Massachusetts and other areas with even large highway projects.</p> <p>I also have heard the noise issue was a major concern factor for Ibis residents. I think that's a part of growth and the noise issue would be minimal. As for residents of the Acreage where the current extension was recently built, I would think they have experienced minimal to no impact. I would hate to think this is an elitist concern from Ibis residents where this issue is '...sure build a road extension but not near my neighborhood' issue versus what's the good of all the area communities, not just the concern for themselves.</p> <p>Growth will happen to this area, it's happening now, and the short-sightedness of some residents to think it doesn't need to happen is selfish and self-centered.</p> <p>Build the extension on the current proposed route of bordering the watershed and Ibis, and build it to accommodate the environmental concerns. It can be done.</p>

			<p>This needs to be done. When I looked at property in 1996 it was slated to go through than. The city of West Palm Beach should not have a say in this. It doesn't effect them, they already proved it would not harm the water. This all started when the mayor of west palm beach lived in that development and she didn't want it to go through so she bought off the law makers. I drove northlake for 21 years and it gets worse every day. Thank God I got a new job in another direction.</p>

			<p>Please. We need this SR 7 to go through to Northlake. I would like the Wedt Palm Beach Mayor to please come out to Northlake Blvd around Coconut or 140th to see the traffic and how you have to take your life into your hands to pull out in that traffic. It is dangerous. Also, if there was a hurricane evacuation we would never get out. The huge developments they are building along Northlake will bring more traffic to an already overloaded road If SR-7 went through to Northlake it would alleviate the traffic from Coconut to Ibis Publix. Oppose	Martin	Korchak	I'm against the proposed extension of SR7 and Roebuck roads through Grassy Waters not only because of the run-off from road surfaces and pollution from vehicular emissions being harmful to the preserves wildlife and the city's water supply, and the traffic noise affecting nearby residences along the proposed routes but because I think it would be almost criminal to change two of the perimeters of Grassy Waters from their (almost) natural state to roads. I am a seasonal resident of Baywinds and one of my favorite things about WPB is to bike and explore Grassy Waters. I'm amazed that there is such a tranquil and natural area within a stone's throw of my home. My least favorite parts of Grassy Waters are the areas adjacent to Jog road and the turnpike. I think it would be criminal to pave any part of it in order to introduce more cars and trucks.	9067 bay point circle	West palm beach	2/18/2020 20:29

The other fact is that Northlake runs right through the water catchment area...the extension only runs along side of it. Oppose	Melissa	Courtney	Have there been environmental impact assessments done on the area to be impacted by this proposal and the other alternative proposals? Would it be possible to create an elevated roadway? I oppose if there are more environmentally sound options that would have less risk of impact on the city's water source. The environmental and human services that Grassy Waters provides should be quantified against the proposal. Has an improvement in public transportation and/or ride shares been considered as an alternative? Although irrelevant at this point, these problems should have been taken into account before the development projects were approved. Hopefully in the future there will be more foresight.			2/18/2020 20:59

Support	Catherine	Barulic	<p>We need this promised roadway. I am a WPB native who has watched the westward growth, and moved to the Acreage in 1983 (remember the swamp land 'out west'?) We have watched the city of West Palm Beach allow and benefit from the tax base of developments along the perimeter of the Water Catchment area with no regard to environmental impact; i.e Andros Isles, Baywinds, Ibis, etc... Northlake Blvd was a little two lane road ending in a dirt road into the Acreage. When the Ibis Development was approved, it was okay to widen Northlake, infringing further into the Water Catchment area, to allow better access/egress for Ibis. SO, the WPB City argument about impacting the Water Catchment area does not hold historically with past practice. Not to mention the developments, I-95, and Australian Ave that abut the Clear Lake end point of the city water source.</p> <p>We live on Royal Palm Beach Blvd which has become a freeway for travelers going north and south between Northlake Blvd and Okeechobee Blvd. Can only imagine how this is going to play out with Westlake, Avenir, and more to come. How are these residents going to commute in and out of these developments when the roadways are already congested and no alternative egress roads.</p> <p>This road was promised to this western communities for years, formerly referred to as the Rangeline Rd. It needs to be completed!!</p>	5781 Royal Palm Beach Blvd	West Palm Beach	2/18/2020 21:00

Support	Nicole	Moore	The infrastructure needs to support the amount of new homes going into this area. We were told upon our purchase that these plans were already in place and the community and city supported it. It's quite frustrating to learn that this road is still a question mark for future residents. The commutes are terrible already and this is before the influx of your new residents. It would be nice to know that our new community and city was doing everything they could to enhance it rather hinder its progress.		Westlake	2/18/2020 21:04

			This is to support the Long Range Transportation Plan inclusion of State Road 7 Extension, widening, and completion from Okeechobee Blvd through to Northlake Blvd. (TPA013 and TPA014). The City of West Palm Beach officials' behind-the-scenes manipulations to prevent the completion of this road are unacceptable, bordering on criminal. The shameless blocking of the North Palm Beach Improvement District permits for SR 7 showed the City of West Palm Beach's contempt for the citizens of this county who live in the western communities. Their fake concern for the environment and the people's water supply is evident when you consider 60th St. N. The City of West Palm Beach has never moved to block the placement of the east west road 60th St. N. running west from SR 7 through The Acreage to Minto's Westlake. 60th St. N. literally sits on the bank of the M Canal, a major feeder of the City of West Palm Beach's water supply. However, the City of West Palm Beach forced the baseball stadium parking lot to be built 500 feet away from the east end of this canal. Does the City of West Palm Beach have a backroom deal with the the developers of Westlake, a city that was created with an illegal vote by Minto employees who used their office address as there residence on their voters registration forms? The new Supervisor of Elections should take a close look at that fake incorporation vote as well? This is another manipulation of the western communities. The County Commissioner and the Judge who certified that vote should have met a similar fate as the former Supervisor of Elections. Furthermore, there should be an investigation into the removal of the original range line road easement that would have continued SR 7 from Northlake Blvd. to connect to the Bee Line Hwy. The Board of County Commissioners voted quietly to delete this easement several years ago with no notice to the western communities. The backroom deals between the elected officials of the cities and the county need to stop. Do what is right for the people living in the western communities. We deserve to be able to travel safely to an from our homes and businesses in an efficient and timely manner. We purchase our properties based on the promise that SR 7 would be built on the original range line from Okeechobee to Northlake. This road must go through or all of you standing

			The corridor of Northlake is over traveled and above capacity. PBC traffic counts support this statement. Additionally, added traffics due to recent constructions of major developments Ancient Tree and West Lake continue to hamstring current ingress and egress. Be responsible and take responsibility for community planning and services by extending the much needed road base. The ability to traverse in emergencies, such as hurricanes, is near nonexistent on the current scheduling of roadway, and the residents require the county take action to protect human life.

The traffic on State road 7 north of Okeechobee is horrible during rush hour with people trying to bail out of the acreage to head east on Okeechobee. Over the past several years the hold up has been nothing more that coddling to the rich who live in Ibis and just don't want to be bothered with hearing traffic from the palatial estates. I live 1 block west of S.R. 7 in Royal Palm Beach. When I moved in 35 years ago it was peaceful and quiet. Since then S.R. 7 has grown along with the entire Royal Palm Beach area. We were not given any special reviews or anything they just widened the road increased the amount of traffic on the road with no concern about how it affected the people. Support	Joseph	Corbisiero	I live in the acreage since 2003 and found Northlake the one and only path out of this area west bond. With thousand of homes being built west of us we need more roads out. When there is a minor accident in any direction on Northlake it can cause a 1 to 3 hour backup because there's only one route out, forcing traffic into school zones back tracking to Royal Palm Beach Blvd. We need common sense when planning and allowing SR7 extension is the only workable plan to help Environmental and safe passage for all.	14155 74th St N	Loxahatchee	2/18/2020 21:47

			As a 15 yr resident of the western communities (Wellington for 12 yrs & Loxahatchee for the past 3.5 yrs). I strongly support the SR7 project being added back on to the Long Range Transportation Plan. All of the original developments of Ibis, and Bayhill Estates, and others were approved on the condition of SR 7 being built to accomodate and connect the roads from southern to Northlake. Years later this project is still being fought with no other true alternative of a north-south highway. Having traffic drive through the Acreage off the current SR 7 extension is absolutely ridiculous and not feasible. The argument by WPB of a roadway next to Grassy Waters polluting their pristine waters is completely untrue. The maintenance and spraying pesticides of the golf course at Ibis has a much more immediate dire effect on the water of Grassy waters. It is a clear case of Not in My Backyard and it is truly unfair to the residents of The Acreage, Westlake, and other new developments currently being built, all with PB County approval. The burden of all the traffic running through local roads will never work and should not be seen as an alternative. PLEASE add back the SR7 project that was promised and planned on years ago. It is the only proper, reasonable plan to alleviate the ever increasing flow of traffic in our western communities. Thank you!!! 			The last thing we need in this era of overdevelopment in the western communities is another throughway intersecting a preserve. The traffic flowing on 441/SR7 is already over burdening the neighborhoods and extending will only attract more traffic. A big NO from our family! This is not the village we researched to move to anymore and it is a shame.

			My family and I live 1 house off coconut and the traffic is unbearable. It's unsafe for our children and us driving on a road that has so much traffic. The the rush hour with everyone between Northlake and Orange trying to get in and out of the area is the worst I've ever seen. Not to mention we haven't felt the added burden of the construction of thousands of new homes. We need this extension to make it worth continuing to live here

			I do not agree with the State Road 7 extension. I have lived in and around the Acreage for the past 16 years. The city of Palm Beach Gardens has excepted monies to allow massive amounts of new home construction without infrastructure. Northlake Blvd is a catastrophe day and night and I feel the SR 7 project would make it worse not better. And my drinking water also comes from the area that the road would be built on. Please take into consideration the wildlife and loss of it by destroying the wet lands.

Support	Connie	Vassalotti	I support both the St Road 7 and the Roebuck Rd extensions. There is less than 2 miles of St Rd 7 to complete the project and WPB has used millions of dollars fighting this. The money should be used to help WPB between Dixie Hwy west to the city line and north of downtown This area needs cleaning up, the homeless need projects, and the whole city should have benefitted for the monies spent and not just one high end community. Especially when that one community polluted Grassy Waters in the early 2000's, and reclaimed water for their golf courses and thought not a thing about it until they were caught. Between West Lake and Avenir 8,000 homes are being constructed, and roads are not adequate to handle the amount of new cars that will be driving on them. Emergency vehicle and police would cut their response time with the St Rd 7 addition. And I live in Baywinds and want Roebuck added, because 8 lanes of traffic on Okeechobee Rd is enough. It is a crime that Okeechobee Rd is so large and Northlake is 4 lanes, because again one community has the money to make others suffer. Please make your decisions on what is best for all of West Palm Beach and not just a few.	2270 Sapphire Circle	West Palm Beach	2/18/2020 23:28

Support	Lisa	Henderson	I very much support the SR 7 extension. To get from Northlake to Okeechobee traffic is forced through several residential streets not intended for so much traffic. It's dangerous and irritating to say the least. I live in Ibis where the extension would run right along the border of my development, right alongside my home so I would very much be affected by the project but still very much support it because it's clearly needed!	8297 Quail Meadow Way	West Palm Beach	2/18/2020 23:31
Support	Nicole	McAdam	The extension road needs to be open so the people living in the Acreage will have a less issues with traveling to and from the Western areas. Oppose	Denise	Price	Please do not build the SR7 extension through Grassy Waters. It is a very sensitive area, they have already torn out a lot of land for those 2 new developments Avenir and Ancient Tree (which that name is a joke, if there were any ancient trees in there, they're long gone-destroyed). GWP is a drinking water reservoir and it needs to be left alone, not have a road go through it.			2/18/2020 18:57
Oppose	Nikki	Descoteaux	I am writing in opposition to any extension of State Road 7 that would take it near Grassy Waters Preserve. This is a critical drinking water source for West Palm Beach. We need to protect our water sources as a priority. Why extend roads and encourage more traffic? That just compounds the infrastructure, traffic and pollution problems we already have. I support expanding our public transportation system which falls woefully short of getting people out of their cars and onto mass transportation. Most of us can't get from point A to point B reasonably on buses and the like. Better transportation is what we need, not roads that increase automobile traffic. Last month, Amy Baker, director of the Legislature's Economic and Demographic Research office presented her annual assessment of Florida's water resources to the Senate Environment and Natural Resources Committee. Baker warned that by 2025, "we expect that the forecast of water demand will exceed the water available — an inferred water supply problem." Baring this in mind, why take the chance of creating additional water resource problems by putting a highly trafficked road near a major water supply of our county? We need to use common sense, please. Thank you for your consideration.			2/18/2020 17:04
Oppose	Bruce	Allen	It is insanity to put a 4 lane hwy through the water supply for West Palm and Palm Beaches (including Mara Lago). The potential catastrophic consequences for commerce and tourism must be avoided. Commissioners: use your commonsense and find another route for SR 7, out West where the new construction is taking place.			2/17/2020 15:05

Support	Jeanne	Taylor	It would be ideal if we did not have to build another road as we are running out of habitat for wildlife. Unfortunately, as long PB County continues to permit development, residents have to move about as well. I can not believe the City's argument of protecting the water supply; Lake Mangonia (same water supply / different neighborhood) along Australian Ave is about as bad as it gets in not mitigating or protecting the water supply. Our neighborhood has reached out to Ibis several times for their support to help with Lake Mangonia and Australian Ave. Not a peep back from Ibis. Meanwhile - all our dollars from the Northend of the City goes to fighting this road. Lets Build It! Lets be honest it's never been about water quality - they built in the water catchment area along with their golf course; disturbingly hypocritical! Ibis' actions to fight this road with millions of City dollars has burdened the City's poorest neighborhoods with Environmental, Social and Economic disinvestment. Most residents do not realize the City is also on the hook for cleaning Ibis' golf course to pile on the hypocrisy. All the road approvals are in from the environmental and water agencies; the road should be built to help move the people in the western area. The City needs to STOP and be responsible stewards focusing on their eastern roads, flooding and mitigation. Ibis' road if on a scale of 1-10 and 1 being a PRIORITY Ibis would be a 10. The City, unfairly has been fighting this road at the expense of the rest of the City's flooding roads, Flagler and Australian to name two that would rank 1 and 2 in priority! Build the road and lets move on. Who knows if Ibis' property values would go down - they may not. However, if they were not so insular, they'd be thinking about mitigation dollars for their new road.			2/17/2020 13:06
Oppose	Matt	Krebs	In January, Commissioners passed a resolution in support of the protection of Grassy Waters Preserve. This was a bold, forward looking move. As human population continues to grow we find ourselves doing irreparable damage to our environment. We must continue to be bold and protect the resources we have remaining. If we learn one thing from history it is humans need to work in conjunction with nature to support all living things on this planet. Instead of looking to build new roads to support increased traffic we should put our focus on alternative means of transportation that take cars off the road. Please continue the fight to oppose the extension of State Road 7 and support our environment and protect the Grassy Waters Preserve.			2/17/2020 12:03
Oppose	Serena Ann	Hoermann	Please reject the plan to add the extension of State Road 7 back into your long-range transportation plan. You must protect the 23-square mile pristine remnant of the Everglades, home to endangered species, and source of the City's drinking water supply.			2/17/2020 10:11
Oppose	Janette	Hernandez	I don't understand why this extension is back up for review. My understanding was this was already taken off the plans. The PRIORITY should be of ensuring we don't further pollute our environment and water supply. The long range affect would be more funds needed to clean up an already diminishing water supply. Is this progress? I ask that this committee give serious thought of the consequences of further developing the road systems through our water supply. We already have perfectly navigable roads and no real need to expand except for the convenience of few. As the voice of a palm beach county resident and A grassy water preserve neighbor, I therefore ask that the highest consideration be given to remove plans for extension and allow the prior decision to remove plans to become permanent.			2/17/2020 10:01
Oppose	Teresa	Griffin	Please do NOT proceed with extension of State Route 7, from Okeechobee to Northlake. It puts our precious drinking water, as well as endangered species, at risk. I am in favor of protecting our environment.			2/16/2020 19:38
