PROJECTS

We thrive on working with our clients, partners, and other like-minded organizations to improve the quality and function of the built environment. We seek to improve the balance of multi-modal transportation options and create successful public spaces as a means to creating more competitive and sustainable 21st century communities. We fulfill this mission by working at the intersection of transportation, land use, and urban design in cities and towns across the United States and abroad. Street Plans is currently working on such projects in diverse communities, including New York City, San Francisco, Miami Beach, Pinecrest, FL, Ponderay, ID, and Burlington, VT.
