RE: RE: 2019 TAP Application- Non-Motorized Improvements

Dear Mr. Uhren:

I am writing in support of the Indian Trail Improvement District’s application for the 2019 Transportation Alternative Program Grant. The District is applying for $1 million for the design and construction of contiguous multi-use pathway improvements along several roadway corridors. The Florida Department of Transportation will manage the project, while the District will appropriate sufficient funding to ensure continued operation and maintenance in the future.

The grant program will assist the District with improving multi-modal transportation opportunities throughout the community. The development of a new multi-use pathway and sidewalks is needed due to increased demand, higher levels of traffic, and growing safety concerns.

Over the past decade, the District’s roadways have seen increased traffic and the number of accidents has risen. The proposed project will improve the safety of not only pedestrians and bicyclists but also automobiles traveling through the community.

Thank you for your time and consideration.

Sincerely,

Melissa McKinlay
Board of County Commissioners
District 6

RE: 2019 TAP Application- Non-Motorized Improvements

Dear Mr. Uhren:

The Acreage Landowners Association supports Indian Trail Improvement District’s application for the 2019 Transportation Alternative Program Grant. The grant program will assist the District with improving multi-modal transportation opportunities throughout the community. The development of a new multi-use pathway and sidewalks is needed due to increased demand, higher levels of traffic and growing safety concerns.

Over the past decade, the District’s roadways have seen increased traffic and the number of accidents has risen. The proposed project will improve the safety of not only pedestrians and bicyclists but also automobiles traveling through the community.

Sincerely,

Melissa Tinsbaugh
President
Purpose and Benefit

- Increase the safety of pedestrians, hikers, bikers and drivers
- Improve transportation modes to create a better community.
- Enhance access to schools and parks for non-motorized users
- Meet ADA guidelines
- Further the Districts transportation system improvement initiative
