The objectives of a PD&E study are to perform necessary social, environmental and engineering studies of a proposed transportation improvement to support decisions concerning if and where it should be built and what will be the basic design concepts.
Location Map
History

- Feasibility Study – completed December 2014
- Current rehabilitation job to begin summer 2016
  - Pile jacketing to reinforce 13 existing piles
  - Construction to last approximately 67 days
PD&E Study Components

- Public Involvement
- Engineering
- Environmental
Public Involvement Meetings

- Elected Officials/Agency Kickoff Meeting – February 17, 2016
- Public Kick-off Meeting – February 17, 2016
- Alternatives Public Meeting – tentatively fall 2016
- Public Hearing – tentatively early 2017
Engineering

- Data Collection and Analysis
- Bridge Structure
- Design Alternatives
Existing Bridge – Structurally Deficient, Functionally Obsolete

- Substructure rated “4”
- Superstructure rated “4”
- Structural deficiencies
- Existing concrete pile jacketing
Existing Clearance

- Existing Vertical Clearance - 25.0’
- Existing Horizontal Clearance - 80.0’
Alternatives Analysis

- No Build Alternative
- Build Alternatives:
  - Vertical Alignment
    • Low-Level bascule
    • Mid-Level bascule
    • High-Level fixed
  - Horizontal Alignment
    • Remain in place
    • Shift east
    • Shift west
Maintenance of Traffic Options

- Detour via Alternate A1A
- Temporary bridge
- Phase construction using one of the existing bridges

Project Status

- **Working Toward the Alternatives Public Meeting**
  (tentatively fall 2016)

  - Evaluate future traffic levels and operational performance
  - Develop horizontal and vertical alignments
  - Evaluate environmental effects

- **Continuous Public Involvement**
  - Palm Beach Metropolitan Planning Organization
  - Stakeholders
  - Project team available for presentations
